The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Supervisors:

**A LICENSE AGREEMENT FOR THE OPERATION OF THE
AQUATIC SAFETY PROGRAM AT
THE BOATING INSTRUCTION AND SAFETY CENTER
WITHIN THE WARREN M. DORN COMPLEX
AT CASTAIC LAKE RECREATION AREA
(SUPERVISORIAL DISTRICT 5) (3 VOTES)**

SUBJECT

This action is to request delegated authority to the Director of the Department of Parks and Recreation, to execute a License Agreement with California State University at Northridge, for the continued operation of their Aquatic Safety Program, at the Boating Instruction and Safety Center, located within the Castaic Lake State Recreation Area.

IT IS RECOMMENDED THAT YOUR BOARD:

1. Find that the proposed License Agreement is categorically exempt from the California Environmental Quality Act because it consists of leasing an existing public facility with no expansion of use and for the reasons stated herein and the reasons reflected in the record of the project.
2. Delegate authority to the Director of Parks and Recreation to execute a five year License Agreement between the County and California State University at Northridge for the use of the Boating Instruction and Safety Center, located within the Warren M. Dorn Complex at Castaic Lake State Recreation Area. The License Agreement has an initial five year term, with a one time five year optional extension and will become effective the first day of the month following Board of Supervisors approval. The License Agreement will provide annual revenue of \$8,437.50 for rent, an annual utility payment of \$12,000, and a minimum of 12 percent of its gross revenue from its

Summer Youth Camp Program.

3. Authorize the Director of the Department of Parks and Recreation to suspend, terminate or assign the License Agreement, if deemed necessary, in accordance with the approved terms and conditions of the License Agreement.

4. Authorize the Director of the Department of Parks and Recreation to exercise the five year option, if in opinion of the Director of the Department of Parks and Recreation, the Licensee has performed successfully during the initial contract term.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of the recommended action is to approve a five year License Agreement with a one time five year optional extension with California State University at Northridge (CSUN) for the continued operation of their Aquatic Safety Program provided at the Boating Instruction and Safety Center (BISC) located within the Warren M. Dorn Complex at the Castaic Lake State Recreation Area. The BISC is a facility built by the State of California Department of Boating and Waterways for the purpose of conducting instructional training in the safe handling and operation of various watercrafts.

CSUN has, as part of its Community Services classes and Department of Recreation and Leisure Studies, an Aquatic Program component that instructs, educates, and trains enrollees in the safe use of water skis, boats and similar watercraft; including, launching and recovery of boats from the dock area. CSUN has conducted these aquatic programs at Castaic Lake since 1984. The Community Services classes are not restricted to the CSUN student population, but are open to and marketed toward enrollment by members of the general public.

The classes have been well attended and provide a much needed adult training program for safe use of watercraft at Castaic Lake. An additional and enhancing segment of this program is the Summer Youth Camp Program. During the summer months, youth groups and individuals can learn boating use and safety under proper adult supervision. CSUN's Aquatic Program has been conducted expertly and has been very well received by the public. Based on the need and popularity of this program, the Northwest corner of the Afterbay area, will be available for use by CSUN, as an alternate location to be used in conjunction with its Aquatic Program being conducted at the BISC facility. CSUN will continue to maintain two existing portable buildings within this corner of the Afterbay area, one for classroom use and the other for storage. In addition, CSUN is required to provide the necessary general liability insurance and name the County of Los Angeles as an additional insured, prior to the Contract start date.

Implementation of Strategic Plan Goals

The proposed License Agreement will further the Board-approved County Strategic Plan Goal 1, Operational Effectiveness, by utilizing experienced personnel to schedule and conduct boating safety education; providing a Summer Youth Camp Program, where youth groups and individuals can learn boating use and safety under proper adult supervision; and by generating revenues and providing funding for infrastructure maintenance and repair at the Castaic Lake State Recreation Area.

FISCAL IMPACT/FINANCING

CSUN will pay the County an annual amount of \$8,437.50 for rent, plus an annual utility payment of

\$12,000 for the cost of electricity to operate this Aquatic Safety Program at Castaic Lake Recreation Area. CSUN will also continue to pay a minimum of 12 percent of its gross revenue from its Summer Youth Camp Program.

CSUN's Aquatic Safety Program is a financially self-supporting unit of the University's Department of Recreation and Leisure Studies. The University's program staff will maintain its portable buildings, licensed premises, and conduct all programs and classes. The County's maintenance of the BISC exterior and interior areas will be offset by their rent payment.

In consideration for the use granted, CSUN shall pay the County, for five years, an annual total of \$20,437.50, consisting of a flat amount of \$12,000 for the cost of electricity and annual amount of \$8,437.50 for rent. CSUN shall pay the County in three equal installments of \$6,812.50. Additionally, CSUN will pay the County a percentage of its gross revenue from its Summer Youth Camp Program, according to the following percentage breakdown identified below:

- 12 percent of all gross receipts up to \$10,000; and
- 20 percent of all gross receipts between \$10,001 and \$30,000; and
- 30 percent of all gross receipts in excess of \$30,000

OPERATING BUDGET IMPACT

As a result of the recommended actions, the Department anticipates an annual revenue increase of \$20,437.50 to its operating budget from rent receipts which includes the cost of utilities. The increase will be effective over the initial five year term of the agreement but may extend beyond this if the Department decides to exercise the agreement option.

The Department will also receive additional revenue beyond the aforementioned rent from its share of CSUN's Summer Youth Camp Program fees as stated in the Fiscal Impact/Financing section. The amount of additional revenue cannot be estimated at this time due to several factors: 1) this revenue is new to the County; 2) lack of historical data; and 3) revenue to the County is based on tiered schedule. However, the Department anticipates this component of the revenue to be small.

The Department will maintain this revenue in its Operating Budget to offset the costs resulting from the facility usage of CSUN's aquatic programs. Should the revenue from the Summer Youth Camp Program become significant, the Department will address this in the appropriate year's Operating Budget request.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The County of Los Angeles, through its Department of Parks and Recreation, is authorized by the provision of Government Code Section 25907 to grant licenses and leases for the provision of parks and recreation related activities.

The term of the License Agreement has an initial five year term, with a one time five year optional extension.

Participants of CSUN's Aquatic Safety Program will be authorized to enter the Castaic Lake State Recreation Area without being assessed a vehicle entry fee during the preparation or when conducting instructional classes and/or providing the Summer Youth Camp Program. However, in order to ensure the continued operation of the Aquatic Safety Program, the Department recommends the following deviations from the County's standard terms and conditions:

- Indemnification: It is recommended that the County shall retain prior and ongoing responsibility for all matters relating to any preexisting environmental issues, and shall indemnify CSUN for all matters relating thereto.
- Termination for Convenience: The License Agreement includes termination provisions for improper consideration and for the failure of the Licensee to comply with the County's Child Support Program. In addition, the Agreement addresses the County's Quality Assurance Plan.

County Counsel has approved this License Agreement as to form. Additionally, CSUN has executed the attached License Agreement and will provide the required insurance policy naming the County of Los Angeles as an additional insured, prior to the Contract start date.

ENVIRONMENTAL DOCUMENTATION

The proposed License Agreement is categorically exempt from the California Environmental Quality Act (CEQA) according to Section 15301 and of the State CEQA Guidelines and Classes 1 (r) of the Environmental Document Reporting Procedures and Guidelines, adopted by your Board on November 17, 1987, because it consists of leasing an existing public facility with no expansion of use.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

This Agreement will permit CSUN's Aquatic Training Safety Center to continue to provide water safety instruction and training to CSUN students and the general public through its accredited and non-accredited programs, and continue its numerous summer water safety programs, including those benefiting at-risk youth.

CONCLUSION

It is requested that an adopted copy of the action taken by your Board and four (4) fully executed copies of the attached contract be forwarded to the Department of Parks and Recreation.

Upon written notification of approval, Licensee accepts the licensed premises in their physical condition, and agrees to make no demands upon County for any improvements or alterations.
- 3.6 CSUN may make or construct or cause to be made or constructed additions, alterations, repairs or changes to the licensed premises at CSUN's expense, provided written approval thereof is first obtained from the Director and the State, permits are obtained therefore as hereinafter required, and there is compliance with such terms and conditions relating thereto, as may be imposed thereon by the Director or the State.

7. DESTRUCTION OF THE LICENSED PREMISES AND/OR CASTAIC LAKE RECREATION AREA

7.1 In the event the BISC shall be totally or partially destroyed by a risk covered by the insurance coverage required herein, the County shall terminate this Agreement and the loss adjustment shall be payable to the State of California Department Boating and Waterways for deposit in a trust fund with the State of California designed for use by the Department of Boating and Waterways. If the Department of Boating and Waterways deems it in the interest of the State of California, the proceeds may be

paid to the County upon the County's application for the reconstruction of the destroyed facilities. If the destruction is from a risk for which coverage is not required or provided under said policy of insurance, County shall either restore the BISC or terminate this License.

- 7.2 CSUN agrees to accept the remedy heretofore provided in the event of a destruction of the BISC and/or Castaic Lake Recreation Area and hereby waives any and all additional rights and remedies for relief or compensation that are presently available or may hereafter be made available under the laws and statutes of this State.

CSUN shall meet with representatives of the Director to consider the appropriate

course of action with respect to such matter and CSUN shall take reasonable measures under the circumstances to assure the Director that the conduct and activities of CSUN's employee will not be detrimental to the interest of the public patronizing the licensed premises.

8.7.3 CSUN warrants that it fully complies with all laws regarding employment of aliens and others, and that all its employees performing services herein meet the citizenship or alien status requirements contained in federal and state statutes and regulations including, but not limited to, the Immigration Reform and Control Act of 1986 (P.L. 99-603). CSUN shall obtain, from all covered employees performing services herein, all verification and other documentation of employment eligibility status required by federal statutes and regulations as they currently exist and as they may be hereafter amended. CSUN shall retain such documentation for all covered employees for the period prescribed by law. CSUN shall indemnify, defend, and hold harmless, the County, its agents, officers and employees from employer sanctions and any other liability which may be assessed against CSUN or County or both in connection with any alleged violation of federal statutes or regulations pertaining to the eligibility for employment of persons performing services under this Agreement.

AQUATIC INVASIVE SPECIES**

California's waterways currently face an enormous challenge: an invasion by Quagga mussels (*Dreissena rostriformis bugensis*) and Zebra mussels (*Dreissena polymorpha*). Zebra mussels, a native species of Eastern Europe, were first introduced in the United States through ballast water released into the Great Lakes in the late-1980s. Quagga mussels soon followed.

Great efforts were made to prevent the spread of these fresh water mollusks west of the 100th Meridian. In January 2007, Quagga mussels were discovered in Lake Mead and later in other reservoirs of the Lower Colorado River. Now they infest water bodies in Riverside, San Diego, Imperial and Orange counties. In January 2008, Zebra mussels were discovered in San Justo Reservoir in San Benito County. The spread of these mussels to additional California waters will seriously impact the state's aquatic environment and water delivery systems, endangering recreational boating and fishing.

It is important for all boaters to cooperate with vessel inspections conducted at California Department of Food and Agriculture Border Protection Stations and on waterways around the state. Remember, you do not want to transport any Quagga/Zebra mussels from an infested water body to another location currently free of Quagga/Zebra mussels. In addition, California law makes it illegal to transport these aquatic species, even if done so unintentionally.

In an effort to reduce the potential for introduction of non-native Dreissenid Mussel Species into areas of the State Water Project (SWP), Los Angeles County Department of Parks and Recreation (P&R) has implemented a comprehensive watercraft inspection program.

Watercraft Inspection Program

- All California State University at Northridge (CSUN) watercrafts must be inspected by P&R trained inspectors prior to launching at Castaic.
 - This includes any privately owned watercraft brought onto the facility for the use at CSUN sponsored programs.
- To meet this inspection requirement all watercraft on site will be initially screened and inspected. CSUN vessels not leaving the premises do not need to be tagged and/or inspected each day before launching. CSUN vessels leaving the premises must be tagged and/or inspected before launching.
- CSUN staff will insure that prior to temporarily removing watercraft outside the property they will have the boat "tagged" or "banded".
- Watercraft return to the facility will not require re-inspection as long as the tag is still in place.
- All untagged watercraft that enters the facility will be required to pass the aquatic invasive species inspection.

Boater and watercraft users can prevent these mussels from spreading by:

- After boating in any freshwater system:
 - Carefully inspect, clean, and drain your boat when you leave the water, using the checklists provided.
 - All areas must be dry (including live wells) and clear of debris, and no standing water should be on board your boat in any manner (including bait cans or buckets).
- Before traveling to any freshwater for boating:
 - Inspect your boat for Quagga/Zebra mussels, which can survive five days out of water in California's hot summer and up to 30 days in cool, wet weather.
 - If any residual water or mussels are discovered upon an inspection, clean your boat and all equipment using the same checklist procedures and let the vessel dry for five to 30 days, depending on the weather, before you enter the water.

Inspect and Cleaning Checklist:

All Watercraft

Whenever you leave freshwater, take the following actions:

- **Remove the boat from the water and away from the launch ramp** for vessel inspection and cleaning.
- **Thoroughly inspect all exposed surfaces on your vessel and trailer.** If you find any mussels, scrape them off and kill them by crushing them. Dispose of the remains in the trash. Alert the Department of Fish and Game at 866-440-9530.
- **Remove all plants and mud** from your boat, trailer, and all equipment. Dispose of all material in the trash.
- **Carefully feel your boat's hull** for any rough or gritty spots, which may be young mussels that have settled on your vessel and cannot be seen. Microscopic Quagga/Zebra mussels will feel like sandpaper.
- **Away from the waterway, wash your boat's hull,** trailer, equipment, bilge, and any other exposed surfaces with high-pressure, hot water. When possible use water at a temperature of 140° F (60° C) at the hull – or about 155° (68° C) at the nozzle – which will kill the mussels. Dry the boat as much as possible.
- **Drain all water from your boat** (pull all plugs) and **dry all areas**, including the motor, motor cooling system, live wells, ballast tanks, bladders, bilges, and lower outboard units. Make sure that all life jackets, water skis or other items that have been in the water, including anchors, ropes, etc., are inspected, cleaned, and dried.
- **Empty and dry all buckets and dispose of all bait** in trash receptacles before you leave. Do not take bait home, or leave it on the ground or dump it in any waterway.
- **Thoroughly clean all fishing and recreational equipment** (fishing nets, etc).
- **Clean and dry personal belongings, clothing, and footwear** that have come in contact with the water.
- **Wash, dry, and brush pets** that have been in the water.
- **Keep your watercraft dry for at least five days in warm, dry weather and up to 30 days in cool, moist weather** before launching into a freshwater.

Day boats or those that “come and go” and spend only a few hours in the water are still at risk for picking up and transporting mussels that may be attached to aquatic weeds. The basic cleaning steps apply to any and all watercraft.

Additional steps for specific boats follow.

Vessels that are slipped and moored at infested waters run greater risk of having settlers and adult mussels.
